

APPLICATION EXAMPLE: **MANTRACOURT TAKES POLE POSITION IN RACE CAR WEIGHING**

THE APPLICATION

The world of motor racing is highly competitive and one of the keys to success is to manage and optimise the balance of the race car. Mantracourt, a leader in high precision measurement electronics, through its French distributor Mantra France, has been working with the Sébastien Loeb Racing (SLR) team to supply a weighing system that would give their cars a competitive advantage.

KEY BENEFITS

- ▶ Simple to use system provides accurate and repeatable data.
- ▶ Wireless acquisition modules provides data to powerful data logging software for a graphical representation of the car's weight distribution.

"The Mantracourt system was just what was required in terms of accuracy, reliability and repeatability. The service we received was excellent, with all engineers knowledgeable and helpful. We are delighted and the system has become a vital part of our race to success."

Jean Philippe Nicolao, SLR Team
